The **S.H. BORBRIDGE CO**
ESTABLISHED 1798 **WINNIPEG** ESTABLISHED 1798

FROM OUR OWN FACTORY

FOR over one hundred years we did a Wholesale Harness business. We manufactured and sold to the dealers. The harness we made always had a good reputation, because it was always well made from honest material. For nearly six years we have been doing a strictly Mail Order business. All the harness we have been making in our factories, during this period has been sold direct to the consumer at very much lower prices than he would have paid had he bought in the regular way from the local dealer.

BUYING DIRECT SAVES MONEY

By our newer and more modern system of merchandising our customers have not only been saving money on their purchases but they have also been supplied with better goods. Since we have been in the Mail Order business we have been studying the harness needs of the Western farmers at close range, and we have found out a good many things that a century of manufacturing did not teach us. All this knowledge has been incorporated into our harness so that we are now making the best harness we have ever turned out of our factories.

OUR HARNESS HAS QUALITY AND VALUE

Both our Wholesale and our Mail Order experiences have taught us that the Western farmer does not want cheap harness just because it is low priced; nor does he want high-priced harness that does not represent good value. Quality and Value must go hand-in-hand. Quality and Value are the outstanding features of Borbridge's harness.

WE SELL SOLELY THROUGH THE MAIL

When you want Borbridge harness you must buy direct from us by mail. We no longer sell to dealers nor do we employ agents. Our reason for making this statement is that some of our customers have written us telling of dealers who had on display, harness of inferior quality which they claimed they had bought from us. These statements are always made to discredit our goods by harness-dealers who cannot compete with our values, and these statements are absolutely untrue.

WE HAVE ADDED IMPLEMENTS

When you look over this catalogue you will note that we have added some lines of farm implements. We have been careful to include only lines that have been on the market for years, and that have proved their merits. We have also made careful provision by which repairs can always be supplied promptly; and, if at any time expert advice is required, expert advice will be supplied, and expert service given.

WE MAINTAIN OUR HIGH STANDARD

We are confident that the farm implements we are showing will measure up to the high standard of Borbridge harness, and, quality considered, our prices represent the very best values obtainable, just as our harness prices represent the very best harness value procurable.

Remember, too, that the machinery we sell, like the harness we sell, is purchased subject to our liberal guarantee of satisfaction or money refunded.

DIRECT TO YOUR FARM

BORBRIDGE'S PIONEER PLOW HARNESS

PRICE
DELIVERED

33⁴⁵

For $\frac{3}{8}$ -inch leather lines add 3.10
For 1-inch leather lines add 4.00

This harness is just what the name implies. The price and the style make it eminently suitable for the beginner in farming. It is strong enough to meet any demand that may be made upon it on the farm, and it can also be used for road-work. For the experienced farmer it is equally suitable and at our price is a genuine money-saver. For these reasons we have selected it as this season's leader, and we recommend it to all who want a strictly high grade General Utility harness at a low price.

BRIDLES—Three-quarter inch cheeks, with harness leather square pattern blinds, brass spotted; three-quarter inch throat latches; one and one-half inch crowns; seven-eighths inch doubled and stitched leather browbands; heavy Japanned bits with fine two-inch brass rosettes.

LINES—One-inch web, twenty-two feet long, with snaps.
BREAST STRAPS—One and one-half inches with snaps and slides.

MARTINGALES—One and one-half inches.

HAMES—Varnished wood, bolt style.

HAME STRAPS—One-inch, made of superior quality California chrome leather, double and stitched.

TRACES—Made of four ply heavy waterproof canvas belting, 2 inches wide, six feet four inches long with six link heel chains.

BACK BANDS—Four-inch harness leather housing; lined with heavy wool felt; with neatly pinked edges; one and one-quarter inch stitched leather billets with Conway loops.

BELLY BANDS—Folded with layer; one and one-half inch buckles.

EXTRAS—Spreader chains and snaps for lines.

MOUNTINGS—Black Japanned with brass rosettes.

FOUND THEM VERY SATISFACTORY

All summer I have been using five sets of harness equipped with your web traces and I have found them very satisfactory. None of them show any signs of use as yet. I have done some very heavy hauling with them, and they have not stretched a particle.—WILLIAM GOGGIN, Sydney, Manitoba.

With Layre Trace

For one and one-eighth inch lines add to prices shown...90

Here is shown our "Queen of the Road" harness equipped with our popular Layre Trace. As the description states, this is a two-ply trace made with one thickness of heavy leather and

a layer somewhat narrower of superior cut trace leather. One of its advantages is that it is very pliable, but none of its strength has been sacrificed to pliability. It is a great favorite.

PRICE DELIVERED **58.80**

Horse Collars to

All the horse collars we sell are made in our own factory and we can confidently recommend them because we know that the materials from which they are made are right and that the workmanship will stand the closest inspection.

Our short straw collars are made on the most modern machinery procurable so that they are not only well made but are also the correct shape for comfort, the draft being particularly wide. Our long straw collars are made entirely by hand, and we have no hesitation in stating they are fully equal to the best long straw collars procurable in Canada or in any other country. Only the very best materials are used in their making and they are the handiwork of the best long straw collar-makers in the country.

We are positively certain that whether you select our short straw or our long straw collar you will be satisfied.

GENUINE HAND-MADE LONG STRAW HORSE COLLARS

BORBRIDGE'S SADDLES OF QUALITY

PRICE DELIVERED

16.10

We not only give the very best saddle values obtainable, but we also give the very best styles obtainable. All our better grade saddles have been designed to meet the requirements of the ranch. Only the very best of materials are used in the making and the most skilled workmen are employed so that the finished article not only has the appearance but also the quality to stand the most vigorous tests it may be put to. Our business since opening our saddle factory has altogether exceeded our expectations and we have yet to hear of a single case where the user has not been fully satisfied.

OUR "HANDY FARMER"

This saddle is single-rigged and will be found useful about the farm for work where it would be gross extravagance to use the more expensive ones.

BORBRIDGE'S "LOW-PRICED LEADER"

This saddle is specially designed to meet the demands for a low-priced outfit such as is very generally used on many farms. It is made from carefully selected stock and has wheel border. It is exceedingly attractive in appearance. The material used throughout is of the very best and the workmanship is far superior to what would naturally be expected in a saddle at this price.

SPECIFICATIONS

- TREE**—Morgan style, 13 1/4 inches.
- HORN**—Steel repair fork, leather covered.
- SEAT**—Full seat with cantle and side jockeys in one piece.
- SKIRTS**—Square cornered; felt lined; 21 1/2 inches long; 10 1/2 inches deep.

BORBRIDGE'S "FARMER'S FRIEND"

PRICE DELIVERED
37.95

Saddle is made of finest quality California saddle leather and has rolled stamped front and cantle, with wheel border. It is a very much better grade of saddle than one would expect to get at this price with all materials selling as they are at present. You will notice by the specifications that there is nothing cheap about it. It is, in fact, another illustration of the saving that can be effected by eliminating middlemen's profits and selling direct from the factory to the user. It is strictly high grade in all respects, being of Borbridge make, of Borbridge quality, and selling at Borbridge's factory price.

SPECIFICATIONS

- DESIGN**—Wheel border, with rolled stamped front and cantle.
- TREE**—"Steinway," 14 1/2 inches, with bulge.
- HORN**—Steel fork, leather covered.
- SEAT**—Cantle, seat and side jockeys in one piece; cantle finely stitched.
- SKIRTS**—Square cornered; length, 24 inches; depth, 11 inches; lined with felt.
- FENDERS**—16 inches long; 6 1/2 inches wide.
- STIRRUP LEATHERS**—2 inches wide; 5 feet 6 inches long to lace.
- STIRRUPS**—Best white ash, zinc bound.
- GIRTHS**—Double, with 20-strand Texas cinch, and 4-inch web rear girth, with leather wear pieces under rings.
- RIGGING**—Double.
- WEIGHT**—About 20 pounds.

POPULAR LINES OF MEN'S SHOES

HIGH GRADE PLOW BOOT

Here is a John Palmer Plow Boot that is growing continually in popularity. Each season finds largely increased sales, and the reason is not hard to find—the shoe combines service and comfort to a larger degree than any other shoe we know of. It is as near waterproof as a leather article can be made, and it is as comfortable as any Goodyear-welted boot procurable. It has bellows tongue and is made from carefully selected, oil-tanned beef hide. The illustration to right gives some idea of the pliability of the sole and the construction of the shoe; it shows a sole that can be bent double and a shoe with sides and sole all in one piece.

Sizes 6 to 13 (no half sizes)

SIZE**

MEN'S AMERICAN ELK SHOE

This shoe is made of the very best quality, carefully selected American Elk. It is blucher cut and has standard screw shank and sewn fore part. On account of the softness of this leather the shoe recommends itself to people with tender feet, or those who do a great deal of walking. It is of rather dressy appearance and can be worn on all occasions.

1R4004 Men's Black American Elk Blucher. Sizes 6 to 12. (No half sizes.) Price delivered, per pair **\$5.75**

PAINTS

When used according to the simple directions which appear on every label, we guarantee these paints to give satisfaction. Your money back if they fail to please.

SAVE THE
SURFACE
AND YOU
SAVE
ALL!

"SUNPROOF" READY MIXED PAINTS

These paints are made from high grade pigments and oil, and on account of their purity, the colors are practically fast to light. That is why we have named them "SUNPROOF." For outside and inside use on houses, churches and other buildings.

One gallon covers from 300 to 400 square feet, for two coat work, the covering capacity depending largely upon the condition of surface to be painted.

HOUSE PAINT COLORS

Cream, buff, light brown, olive, medium brown, light green, pea green, medium green, French green, black, sky blue, pearl gray, slate, colonial tile, light blue, steel gray, lavender, bright red, maroon, outside white, inside white.

FOR BEST RESULTS

Use the paint as it comes in the can, BUT take care to stir thoroughly before using. For the first coat, thin a little with raw linseed if desired.

FLOOR PAINT COLORS

Silver gray, chrome yellow, maroon, golden ochre.

BEFORE APPLYING

"Sunproof" Floor Paints, see that the floor is clean and free from grease, soap and dampness. On a new floor cover the knots with orange shellac before painting. Apply the paint thinly, brushing well into the wood.

These high grade floor paints dry quickly and hard with fine gloss.

Paint one day and use the next.

HIGH GRADE OILS AND GREASES

The oils and greases we sell are internationally advertised and internationally used. They have been on the market for years and the fact that the demand for them has been steadily and rapidly growing is their best testimonial. If you do not find the particular oil that is best suited to your purpose just write us and we will supply you with expert advice.

En-ar-co NATIONAL MOTOR OILS

High-grade oils that are nationally advertised. These products are manufactured from Pennsylvania Premium Crude Oil by a process of refining that eliminates acid treating.

Your tractor, truck or automobile will be lubricated perfectly if En-ar-co National Motor Oils are used. They are guaranteed by the manufacturers not to carbonize or cause engine trouble of any kind.

ZERO—For cold weather lubrication in automobiles.

MEDIUM—For warm weather lubrication in automobiles.

HEAVY—For the lubrication of trucks, gas engines and old automobiles having leaky compression.

EXTRA HEAVY—For all types of kerosene tractors.

(Specify which grade wanted when ordering)

ZERO, MEDIUM AND HEAVY

1R4501—In 1-gallon cans.	Each	1.90
1R4502—In 5-gallon cans.	Each	7.90
1R4503—In 28-gallon half barrels.	Each	43.20
1R4504—In 42-gallon barrels.	Each	60.70

STEAM CYLINDER OIL

Finest quality compounded oil for use in portable and stationary steam engines.

1R4509—In 1-gallon cans.	Each	1.65
1R4510—In 5-gallon cans.	Each	6.90
1R4511—In 28-gallon half-barrels.	Each	34.00
1R4512—In 42-gallon barrels.	Each	46.90

CASTOR MACHINE OIL

A stringy, heavy-bodied oil for all types of slow-moving harvesting machinery.

1R4517—In 1-gallon cans.	Each	1.30
1R4518—In 5-gallon cans.	Each	5.30
1R4519—In 28-gallon half-barrels.	Each	25.15
1R4520—In 42-gallon barrels.	Each	33.65

CREAM SEPARATOR OIL

A very fine pale colored oil for the lubrication of hand-power cream separators. Lubricates perfectly.

1R4525—In 1-gallon cans.	Each	1.20
1R4526—In 5-gallon cans.	Each	4.70

EXTRA HEAVY

1R4505—In 1-gallon cans.	Each	2.15
1R4506—In 5-gallon cans.	Each	9.15
1R4507—In 28-gallon half-barrels.	Each	50.25
1R4508—In 42-gallon barrels.	Each	71.30

PALE AUTOMOBILE OIL

A very suitable lubricant for automobiles. Fairly high fire test.

1R4513—In 1-gallon cans.	Each	1.45
1R4514—In 5-gallon cans.	Each	5.95
1R4515—In 28-gallon half-barrels.	Each	28.70
1R4516—In 42-gallon barrels.	Each	38.95

SUPERIOR HARVESTER OIL

A heavy, red colored machinery oil for binders, mowers, reapers, etc. Will not gum.

1R4521—In 1-gallon cans.	Each	1.40
1R4522—In 5-gallon cans.	Each	5.80
1R4523—In 28-gallon half-barrels.	Each	28.00
1R4524—In 42-gallon barrels.	Each	37.90

UNIVERSAL MOTOR GREASE

A red colored grease of extremely high fire test for use in compression cups, differentials, transmissions and all around the car.

1R4527—In 10-lb. pails.	Each	2.40
1R4528—In 25-lb. pails.	Each	5.35

QUOTATIONS INCLUDE BARRELS

Return barrel or half-barrel, freight prepaid, and we will refund you \$5.00.

EUREKA HARNESS OIL

One of the most useful and most popular harness oils on the market; especially useful in renovating old harness and for keeping new in the pink of condition. This is an oil that should be in every stable and should be freely applied to all harness at all times.

1R4529—Per 1-gallon can	1.85
1R4530—Per 5-gallon can	7.40

MICA AXLE GREASE

Best known axle grease on the market.

1R4531—10-lb. pail	2.35
1R4532—15-lb. pail	3.30
1R4533—25-lb. pail	4.95

NEATSFOOT HARNESS OIL

Superior quality of Compound Neatsfoot oil; free from acids or other ingredients that will oxidize or rot the leather. Goes further and lasts longer than any other harness oil on market. Neatsfoot oil. 1-gallon can. 1R4534 Each 2.10 5-gallon can. 1R4535 Each 9.10

If you cannot find the Plowshare you are looking for in this list write us and we shall endeavor to procure it for you.

QUICK REPAIR PLOWSHARES

These shares are used when it is impossible to find the number on the old share or when, for convenience sake, it is advisable to have shares on hand that can be fitted to more than one make of plow. They can be made to fit the plow by drilling the holes to suit. The landslide extends at the heel and is long enough to cut off to fit any plow.

BORBRIDGE'S SUPERDREADNAUGHT

THREE H.P.
GASOLINE
ENGINE
145.25

3 H.P. SUPERDREAD- NAUGHT GASOLINE ENGINE

This size of engine does a variety of jobs, and does them well. With satisfaction it operates cutting box, cream separator, washing machine, churn, circular saw, up to twenty-four inches; grinder up to six inches, and cutting boxes in small or medium sizes. By means of a line shaft two or three machines can be operated at the same time.

1R4801—3 H.P. Superdreadnaught Gasoline Engine with pulley 8x6 inches and self-starting Webster Magneto
Price..... 145.25

4 H.P. SUPERDREAD- NAUGHT GASOLINE ENGINE

This engine is somewhat heavier than the 3 H.P. and naturally does somewhat heavier work. It will operate a grinder up to seven inches; a circular saw up to twenty-eight inches; a feed cutter of good size, in addition to doing all the other handy jobs about the farm. It is economical on fuel, and does splendid work.

1R4802—4 H.P. Superdreadnaught Gasoline Engine with 12x6 pulley and self starting Webster Magneto.
Price..... 185.25

6 H.P. SUPERDREAD- NAUGHT GASOLINE ENGINE

This engine has an extraordinary record for great power, remarkable economy and durability. Its wonderful economy is due to its specially designed carburetor, its large intake and exhaust, for smooth steady dependable service, for power, economy and endurance this engine has no peer. It will last a life-time and will make and save time and money.

1R4803—6 H.P. Superdreadnaught Gasoline Engine with pulley 14x6 inches and self-starting Webster Magneto
Price..... 257.50

8 H.P. SUPERDREAD- NAUGHT GASOLINE ENGINE

It is large enough to grind grain, saw wood, fill silos, or thresh with an individual thresher. There is no cranking or pulling over compression. The oversize crank shaft; the exceptionally wide bearings; the heavy mass of metal between the cylinder and the bearing, and the absence of intricate parts all make for the durability and simplicity.

1R4804—8 H.P. Superdreadnaught Gasoline Engine with 18x6 pulley and self starting Webster Magneto
Price..... 326.50

OUR LIBERAL GUARANTEE

We guarantee our Gasoline Engine to be made from specially selected material by expert workmen, and examined by experienced inspectors. Any parts that prove defective through workmanship or material will be replaced free.

FARM ENGINES OF QUALITY

OUR Superdreadnaught Kerosene Engine is simple in construction, generates lots of power and is economical to operate. When operated on the lowest grades of fuel it produces almost as much power as if running on gasoline. The reason is that the carburetor vaporizes the mixture in proper proportion. All important parts are made separate from other important parts, such as the water top, cylinder, head and crank gauge. This reduces the expense of repairs and lengthens the life of the engine. Each engine is carefully inspected and tested before leaving the factory, so that it can be easily started when it reaches its destination.

PRICE

\$173.50

3½ H.P. SUPERDREADNAUGHT THROTTLE-GOVERNED KEROSENE ENGINE

This engine will operate the fanning-mill, the churn, the cream separator, the grindstone, the grinder, the feed cutter, and with the addition of shaftings can operate more than one machine at time. Also used in running a lighting plant.

1R4901—3½ H.P. Superdreadnaught Throttle-governed Kerosene Engine with magneto and pulley.

Price **173.50**

6 H.P. SUPERDREADNAUGHT THROTTLE-GOVERNED KEROSENE ENGINE

This engine is designed for heavy work such as sawing wood, cutting ensilage, or crushing grain. It is an exceedingly smooth running machine that can be relied upon to give satisfactory service at all times.

1R4902—6 H.P. Superdreadnaught Throttle-governed Kerosene engine with Magneto and pulley

Price..... **273.75**

8 H.P. SUPERDREADNAUGHT THROTTLE-GOVERNED KEROSENE ENGINE

This is the engine for all classes of work. It is large enough and powerful enough to run a large size grain grinder, a large size saw-frame, to fill a silo, or thresh with an individual thresher. It is made very strong.

1R4903—8 H.P. Superdreadnaught Throttle-governed Kerosene engine with magneto and pulley

Price..... **355.75**

GOOD MACHINE OIL

Is of great assistance in getting the greatest amount of service out of your engine. On page 43 we list a splendid assortment of high grade oil at prices that represent big saving.

A HANDY SIZE FOR MANY JOBS

**1½ H.P.
GASOLINE
ENGINE**

**PRICE
78.95**

Our 1½ H.P. Superdreadnaught Engine is used for many purposes around the farm to relieve the drudgery of hand work. It will pump water at a very small cost. It will run the family churn, the cream separator, the grindstone, pulper, washing machine, small straw cutter or small wood saw at a cost of approximately a cent an hour. It can do more in a given time than can possibly be done by hand and it relieves the farmer of a lot of hard work. It possesses all the features that are characteristic of the heavier Superdreadnaught type—simplicity, surplus power, economy, light weight, superior finish, and cleanliness.

When comparing engines always remember that the Superdreadnaught usually generates power much in excess of its rating so that our 1½ H.P. will do the work of the ordinary 2 H.P. This is the reason why this engine works with such ease; why it gives such splendid and general satisfaction.

SPECIFICATIONS

Horse Power—1½. Bore—3½ inches.
Speed—300 R.M.P. Stroke—4 inches.
Pully—4x4 inches.
Weight—About 225 pounds.

1R5001 1½ H.P. Superdreadnaught Gasoline Engine, with magneto and 3x3 pully; shipping weight about 250 lbs. **Price 78.95**

DOUBLE AND SINGLE PUMP JACKS

OUR DOUBLE GEAR PUMP JACK

An extra strong well built pump jack adapted alike for three way and tank pumps. It has good strong foot rest and all parts are uniform and interchangeable. It will give excellent service for years and is fully guaranteed.

SPECIFICATIONS

Gear Ratio—5 to 1.
Stroke per minute—39.
Pulley—13x2.
Speed—200.
Length of Stroke—5, 7½, 10-inch.
Weight—88 lbs.

1R5002—Double Gear Pump Jack. Each **12.00**

OUR SINGLE GEAR PUMP JACK

Efficient, simple, durable and reliable. Made from best grade materials and guaranteed free from defects in material and workmanship. It is equipped with two 13-inch tight and loose pulleys wide enough for a 2-inch belt and it has three strokes 5, 7½, 10 inch.

SPECIFICATIONS

Gear Ratio—5 to 1.
Stroke per minute—39.
Pulley—13-inch x 2-inch.
Speed—200.
Length of Stroke—5, 7½, 10 inch.
Weight—73 lbs.

1R5203—Single Gear Pump Jack. Price **11.25**

PUMP SPOUT ATTACHMENT

A splendid arrangement for attaching pipe to conduct water from pump to stock trough; is made for three sizes of piping—1¼, 1½ and 2 inch pipe.

1R5004—For 1¼-inch pipe. Each **.65**
1R5005—For 1½-inch pipe. Each **.70**
1R5006—For 2-inch pipe. Each **.90**

BELTING, SHAFTING & PULLEYS

SUPERIOR RUBBER BELTING

We handle only one grade of rubber belting—the best that we can procure. We confidently recommend it for running grinders, wood-saws, feed cutters or any kind of shop work.

1R5101—2 in. wide; 3 ply. Per ft.....	.27
1R5102—3 in. wide; 3 ply. Per ft.....	.40

1R5114	12 inch	4 inch	7.75

RIGID PILLLOW BLOCKS

Made very strong and suitable for ordinary shafting.

1R5115—For 1 3-16 inch Shaft.	Price.....	1.25
1R5116—For 1 7-16 inch Shaft.	Price.....	1.60

RIGID POST BOX

For attaching to side of post in order to keep the shafting away from the wall. Of superior quality of babbit line bearing.

1R5117—For 1 3-16 in. shaft.	Price.....	2.80
1R5118—For 1 7-16 in. shaft.	Price.....	3.50

Easy to Operate.

Lasts a Life-Time.

SPEED GOVERNING LINE SHAFT

This outfit is almost indispensable where Gasoline Engines up to 4 H.P. are used, and where a variety of operations is done with the one engine. The variation in speed is taken care of by Speed Governor, and size of Engine pulley, and the speed is controlled by a hand wheel.

By a special adjustment of a speed governor the speed of the line shaft is regulated to a wide range of requirements of different machines.

1R5125—Eight foot line shaft outfit with 4 pulleys. Shipping weight about 120 lbs. Price complete.....

24.60

1R5126—Twelve foot line shaft outfit with 6 pulleys. Shipping weight about 150 lbs. Price complete.....

31.65

BORBRIDGE'S PLATE FEED GRINDERS

The above outfit is the ideal outfit for the average farmer who is in mixed farming in a limited way. It grinds grain to any degree of fineness or coarseness and does the work rapidly and well.

1R5201 Grinding Outfit consisting of 4 H.P. Engine and 8-inch Grinder; and 30 feet of first grade rubber belting **272.00**

OUR SUPERDREADNAUGHT GRINDER

Is strictly high grade being properly proportioned and made from the best material. Because of the low frame, the hopper, which has a capacity of over four bushel, is one to two feet lower than the hoppers of most grinders. This saves much lifting, and also reduces vibration. The bearings are easily removed. This obviates the necessity of unlacing the belt to place it on the Drive Pulley. The balance wheel is extra heavy. This keeps the Grinder running smoothly and further reduces vibration. Vibration means friction and friction means lost power. By means of a hand wheel and jam-nut the plates can be adjusted to grind extra fine or coarse. The plates are flat as it has been demonstrated that 25 per cent. less power is required to operate flat plates than concave.

OUR LITTLE SUPERDREADNAUGHT

This grinder was put on the market several years ago, and since then thousands have been sold and thousands are now in use and giving satisfactory service. There is, therefore, no question as to the quality of work it will do or as to its durability. The Little Superdreadnaught has many features that are peculiarly its own and that greatly adds to its efficiency. It is provided with ball bearings at the end of the shaft, which take off the end thrust. It has flat plates, which insure long life. It has an adjustable shake which can be adjusted according to the speed and kind of work, so that the grinder can be run with almost any kind of power. This grinder is peculiarly and splendidly adapted for use with gasoline engines.

1R5205 Our Little Superdreadnaught Grinder with 7-in. plate. Price **47.65**

BORBRIDGE'S ROLLER FEED GRINDER

This outfit is capable, not only of taking care of all the Grinding on any farm, but is also capable of doing custom work. It is extra heavily built, and has large capacity and would quickly pay for itself.

1R5301 Chopping outfit consisting of 6 H.P. Superdreadnaught Gasoline Engine, 14-inch, three roller Feed Grinder, 6 foot combination elevator and bagger and 30 feet of rubber belting. Price **429.40**

OUR ROLLER GRINDER

Many claim that the extra initial cost is quickly made up by lower cost of operating, larger capacity, and better grade of work.

Our 12-inch three roller feed mill driven by a 6 h.p. Gasoline or Kerosene Engine has a capacity of 80 bushels per hour, which is just about double the capacity of a similar size plate grinder driven with an engine of the same capacity. In fact several users are operating this roller grinder equipped with shaker screen, elevator and bagger with a four horse engine; but we recommend the larger engine as a positive guarantee of satisfaction. The manufacturer claims that no other grinder on the market can do the same amount of work with the same power.

On account of the large grinding surface and the wide feed the roller grinder has almost double the capacity of the plate type in corresponding sizes. On account of their entirely different construction they can hardly be compared as to size; but they can be compared as to required motor power, and this is just where the roller type scores heavily.

Our roller feed grinder grinds feed fine enough for all classes of stock. It grinds wild oats, wheat, wheat screenings, millet seed, rye,

corn, barley, or oats to almost any degree of fineness. Fine grinding and even grinding are two of its outstanding features. Careful examination proves that all grain is ground with remarkable uniformity. With plate grinders about half of the grain is reduced almost to dust while the other half is nearly whole.

Our roller feed grinder grinds thoroughly and completely every kind and all kinds of noxious weed seeds.

1R5303—Roller Feed Grinder, 12-inch two-roll, capacity 30 bushels

SUPERDREADNAUGHT SAWING OUTFIT

PRICE
535.00

Every part of this outfit is designed with a view to obtaining great strength and the maximum of service. The construction is such that the man at the saw can feed the wood with very little effort and without danger of injury. The frame of the saw is supported from the frame of the truck so that the tilting

board is always in perfect alignment with the saw mandril. In going over the road the table is tilted and acts as a shield to the saw. The sawing attachment in no way interferes with the general utility of the engine for other work. The outfit is mounted on a substantial steel truck and is supplied with a tongue, but without neckyoke, or doubletrees.

1R5401 Outfit consisting of 6 H.P. Gasoline Engine, Steel Saw Frame, 26-in. saw blade and belt, and substantial steel truck, but without doubletrees and neckyoke **535.00**

CORDWOOD TABLE SAW FRAME

Our Superdreadnaught Cordwood Table Saw Frame is made very rigid and strong. The frame is constructed of 3 x 4 material, carefully selected. The Mandril is of high grade steel, accurately machined. The table is hung to make it easy work for the operator. It will accommodate a saw blade up to 30 inches.

1R5403 Complete with balance wheel, no Saw. **29.75**

TILTING TABLE POLE SAW FRAME

Our Superdreadnaught Tilting Table Pole Saw Frame has the same sort of material and workmanship as the Cordwood Frame. The only difference is that it has a lower shaft; which accommodates the balance and makes possible the cutting of long poles. It can also be used to cut cordwood. The table is splendidly balanced so that the work of the operator is greatly lightened.

1R5405 Complete with 75-lb. balance wheel, no Saw. **36.25**

SUPERDREADNAUGHT SAW MANDREL SETS

Made from 1½ inch cold rolled steel; well made, well finished, and smooth running; weight of balance wheel 75-lbs.; length of bearing 5 inches; face of pulley 6 inches, diameter of pulley 6 inches; length of mandrel 48 inches; diameter of mandrel and bearings 1½ inches; diameter of mandrel at saw 1¼ inches.

1R5407 Mandrel complete as illustrated with, 65-lb. balance wheel. **19.25**

SUPERDREADNAUGHT FANNING MILL

PRICE
46.25

There is no machine on the farm that performs more important work than the fanning mill, nor any operation that counts for so much as the proper cleaning of seed grain. Without a dependable fanning mill clean seed is an absolute impossibility. Before deciding on a fanning mill to catalogue we made exhaustive enquiries among farmers and have been guided by the knowledge we gained in this way.

The fanning mill shown here is unquestionably equal to the best fanning mill made. It embodies all the features of all good mills and has other features equally good that are distinctively its own. The frame is well built. The sieves are properly constructed and properly placed, and the wind blast is under perfect control by means of a shutter at the back of the fan.

This mill will clean all kinds of grain, and is complete in every respect. It is shipped with a full equipment of sieves as follows:

Wheat Gang of Nine Sieves

- No. 12—2x10 wire screens.
- No. 13—2x11 wire screen.
- No. 18—9x9 wire screen.
- No. 21—2x6 wire screen.
- No. 29—4x16 wire screen.
- No. 31—14x14 wire screen.

We supply this mill in three sizes as follows:

No. 1—21-inch mill with capacity of from 25 to 35 bushel per hour. This is a hand machine, but have power attachment if desired.

No. 2—32-inch mill with capacity of from 35 to 50 bushel per hour. This is a hand machine, but can have power attachment if desired.

No. 3—40-inch mill with capacity of from 50 to 75 bushels per hour. This is a power mill, and is equipped with power attachment. Our biggest seller.

WE CARRY A FULL LINE OF MACHINE OILS
SEE PAGE 43

OUR SUPERDREADNAUGHT SILO

Increased mixed farming calls for a steady and sure supply of fodder, and the uncertainty of the hay supply makes the silo an indispensable equipment of the farm. We can supply the very best grade silo at a price that represents a material saving. It is made from northern grown Canadian lumber scientifically treated in wood preservative, and imported long leaf yellow pine, which is so provided by nature that further preservative is neither desirable nor necessary. It is equipped with self adjusting hoops, which assure a permanently air tight silo. The door frame and door construction are such as to make the

silos practically air tight, and the door fits so perfectly that the inside of the silo presents a perfectly smooth surface. The joints have self draining mortise so that all in all nothing has been left off the silo that would improve it or increase its lifetime, and nothing could be added that would in any way improve it. If interested write for descriptive literature and price.

GRAIN SCOOPS

These scoops are made from 22 gauge iron. They are black Japan and have fast handles. The back handle is made of heavy round iron, and the whole construction is such as to insure service and conserve energy. This is a strong well made scoop that will stand any amount of heavy usage; half bushel capacity.

1R5514—Grain scoops. Weight about 7½ lbs. **Each**..... **1.25**

THREE POPULAR WASHING MACHINES

BORBRIDGE'S VACUUM WASHER

This is unquestionably the simplest and most durable washer on the market. Its simplicity of construction has done away with many parts such as gearing and balance wheel. It is made of carefully selected superior grade material. It has no cog wheel, no wooden or iron pins to tear or spoil the garment. It is operated by a new device which forces the water through and through the articles of clothing and by so doing forces the dirt out and leaves the cloths perfectly clean. All that is necessary in washing with it is to put 6 inches of hot water into the tub, also a little soap or washing powder; fill the machine with dirty clothes. Turn the handle for about four minutes and wring out. When through draw off the suds, refill with clean hot water, turn another minute, wring out, then put them through the bluing water. You will find the clothing white as snow.

1R5601—Borbridge's Vacuum Washer. Price..... **16.00**

BORBRIDGE'S PURITAN WASHER

This is an easy running, smooth working machine equipped with roller bearing to reduce friction. It washes on the dolly principle, which is a guarantee of minimum labor and perfect work.

The gears are covered in a metal case, which prevents accidents to the operator; and all metal parts that come in contact with the water are heavily galvanized. The tub is built exceedingly strong from carefully selected southern cypress. The sides and bottom of the inside are corrugated, and the wringer board is strongly built and will stand great pressure. Four strong legs are kept in place by strong metal brackets securely bolted to the tub. This washer is thoroughly well made throughout and is finished in natural grain with good quality varnish that not only adds to the appearance but also preserves the wood.

1R5602—Borbridge's Puritan Washer. Price..... **16.60**

BORBRIDGE'S HYDRO POWER BENCH WASHER

PRICE

57.00

On account of the growing popularity of small gasoline engines this machine has been especially designed to be engine-driven. All the gears are enclosed so as to prevent accidents and the wringer can be operated independent of the washer. When the lid is lifted to take out the clothes the operation of the dasher automatically ceases. The mechanism, which connects the driving gear with the wringer is simplicity itself and the workmanship throughout is of the very best grade.

The rollers on the wringer are five-year grades and are guaranteed not only to do satisfactory work, but to last for at least that period.

This is the ideal washer for the farm, which is equipped with gasoline engine. The wringer stand moves along the frame and can be driven in any position.

1R5603 Borbridge's Hydro Power Bench Washer, including belting for wringer and washer drive, but not including loose tubs or baskets. Complete **57.00**

POPULAR PUMPS—POPULARLY PRICED

All the pumps that are shown on this and following pages are specially suited and specially equipped for the climatic conditions of Western Canada. They are made by the leading Canadian Pump Manufacturers and we can recommend them with assurance because both the workmanship and material are of superior qualities, and our prices represent the very best pump values obtainable when quality is considered.

We know that pumps can be bought for less money and we also know that the superiority of the pumps we show more than off-set the slight margin of differences in Prices.

Our pumps have features that are distinctive their own. For instance they are equipped entirely with galvanized piping as it has been found on account of the ingredients of the water in this country that black piping quickly rusts and impregnates the water with rust rendering it an objectionable red color. Another feature is the leathers used. They remain firm after being soaked for hours and the reason is that they are made from specially tanned, specially selected bullock hides.

When ordering pumps be sure to give depth of well as the size of cylinder and piping depends on the height the water has to be lifted.

The Gasoline Engine shown on page 48 furnishes ideal motor power for either of these pumps. It is simple to operate and effective.

THREE WAYS FORCE PUMP

This force pump is designed either to force water through an underground discharge or bring it through the spout in the ordinary way. If your well is located near your house you can pump the water, underground, to the barn by simply turning over the lever above the spout. The pump can be operated by hand, engine or windmill power. It has 3x16 inch brass body cylinder; the stroke can be adjusted to 7 or 9 inches and the capacity is 550 gallons per hour, at 40 strokes to the minute.

1R5701—Three-way pump, 7 foot 1½ inch electro-galvanized set length, and 3x16 inch brass body Cylinder.

Price.....**36.40**

STANDARD STOCK PUMP

This pump can be used in wells up to 50 feet in depth. The cut shows it equipped for hand use, and it can be adapted for use with power by the addition of a wind mill bar screwed into the crosshead. This pump is a great favorite in Western Canada, and it is well adapted for use in this country. It is especially adapted for watering stock, or for any other purpose where large capacity is required. With 9-inch stroke, 40 strokes to the minute, it has a capacity of 1238 gallons per hour.

1R5702—Heavy stock pump 7 foot 2 inch electro-galvanized set length, and 4½x12 inch iron cylinder.

Price.....**15.75**

TWO LEADERS IN PUMP HEADS

The pump heads shown here were selected from a wide range on account of their suitability to the country. They can be used by hand power or can be attached to a wind-mill, and whether operated by hand or mechanical power they give satisfactory service. The stroke can be easily altered to suit the available power. In the installing of all pumps the size of the cylinder and piping must be graded according to the depth of the well. Wells from 15 to 30 feet take a $4\frac{1}{2}$ inch cylinder and 2 inch piping; from 35 to 40 feet they take a 4 inch cylinder and 2 inch piping; from 45 to 50 feet they take a $3\frac{1}{2}$ inch cylinder and $1\frac{1}{2}$ inch piping; from 55 to 75 feet they take a 3 inch cylinder and $1\frac{1}{2}$ in. piping; a ninety foot well takes a $2\frac{1}{2}$ inch cylinder and $1\frac{1}{2}$ inch piping. When ordering a pumping outfit it is always well to remember this; otherwise the pump will not give satisfactory service and will be hard to operate.

OUR GASOLINE ENGINES

Turn to pages 48 to 50.
There you will see our engines
illustrated and described.
Our prices are right.

THE STOCKMAN'S FAVORITE

Of all pumps made this is the favorite with stock raisers. It is easy to operate and lifts a large volume of water. It is made so that it not only can be pumped by hand, but it can be used as a power pump. Ordinarily it is used only to pump water for stock, but when specified can be equipped to force water through a hose attachment; movable spout can be set at the most convenient angle to the pump.

1R5800—The Stockman's Favorite, Standard only **13.50**

THE STOCKMAN'S STANDBY

Generally speaking this pump is like the one to the right. The chief difference is that the one to the right has a wooden handle, while this one has an iron handle. This pump also has a somewhat different leverage. It is shown for hand use, but it can also be equipped to be operated by wind-mill or gasoline engine. It has movable spout, so that the spout can be set at any convenient angle to the pump.

1R5815A—The Stockman's Standby, Standard only **11.90**

Our SUPERDREADNAUGHT FORCE PUMP

This is a heavy well pump of the very highest grade and will easily handle a tremendous volume of water. It is a splendid pump to use for watering stock or for any other purpose where large capacity is required.

It is made so that it not only can be pumped by hand, but also by power. It is ordinarily used to pump water for stock, but when specified it can be equipped to force water through hose attachment for washing buggies and other purposes.

A leak hole is bored in the set link just above the cylinder, which makes the pump anti-freezing. It has movable spout which will not drip and which can be set at the most convenient angle to the pump. It has cast iron stand and ash handle. It is equipped with 4½x12 polished iron cylinder, outside caps. The cylinder is fitted with single leather plunger, galvanized maleable plunger case, hinge valve and brass valve seat. The stroke can be adjusted either to 7 or 9 inches. With the 9-inch stroke and 40 strokes per minute it will elevate 1230 gals per hour.

MIXED FARMING IN WESTERN CANADA

Farmers are rapidly learning that if they are going to consider the fertility of the soil they must go in for mixed farming. The Manure and Straw Spreader on pages 60 and 61 are essential to scientific mixed farming.

BORBRIDGE'S DREADNAUGHT MANURE SPREADERS

This is positively the highest grade Manure Spreader on the market. It has every feature that makes for efficiency, durability and strength. By substituting steel and malleable iron for casting its weight has been greatly reduced, and its strength greatly increased. It is the lightest draft spreader made, and also the strongest.

It is equipped with two pulverizing cylinders, which handle a much higher load than the single. It has steel distributors which do better work and last longer than wooden ones with which other spreaders are equipped. Some spreaders have no distributors at all; but as distributors

are absolutely essential, the Manure Spreader that lacks this equipment cannot do efficient work.

The feed is simplicity itself. It cannot get out of alignment; there are no springs to weaken, no small parts to break or wear out.

The chain conveyor is the lightest and strongest of all styles of conveyors. It never clogs with soft or slushy manure, lime or ashes; and it never

freezes up in Winter. The steel track through which the conveyor runs is 17½ inches from the ground, sufficient to prevent the conveyor from striking the earth when driving through cross furrows.

The construction is extra strong. The rear axle is two inches in diameter, cold rolled steel shafting. The front axle is 1⅝-inch steel. Oak and Hickory are used for cross pieces and front

1R6001 BORBRIDGE'S SUPERDREADNAUGHT MANURE SPREADER complete with
steel distributors as illustrated. Capacity 70 bushels

bolster brace. The castings are largely malleable; the steel principally high carbon steel; the sprocket chain 100 per cent. over strength. The painting is of superior quality, and the workmanship throughout as nearly perfect as skill and a system of triple inspection can make it.

Quality and efficiency considered, this spreader represents the very best manure spreader value obtainable.

\$235.00

USE A STRAW SPREADER TO PREVENT SOIL DRIFTING

Don't burn your straw. It is a splendid fertilizer, a remarkable moisture-retainer, a protection against soil drifting. Straw quickly decays, and in a few months becomes available as plant food. It is rich in phosphorus and potash. The dry matter which makes up 75 per cent of straw quickly works into the top soil, and forms humus which increases the soil ability to absorb and retain moisture. The second year after straw is spread you will find no large cracks caused by frost and Spring weather. Soon after the straw has been spread the wind jostles it about until it lies evenly between the furrows and rows of grain. It becomes part of the soil and acts as a binder that prevents drifting in Summer and washing away during Spring freshets. Straw can be spread rapidly and effectively with the straw spreader shown to the left, which is supplied with a new idea manure spreader at a comparatively small additional cost.

1R6101—Borbridge's New Idea Straw Spreader ready to be attached to manure-spreader.

**WE DO NOT PREPAY CHARGES ON
AUTOMOBILE TIRES**

Outside of the first cost of the auto the greatest expense in operating a car is the tires. During the lifetime of a car about one-half of the original cost is spent in tires.

Compare the above prices with other tire prices and you will find that we have cut your tire expense in half.

Our Blue Bird retread tires are built up on tested casings that have been proved perfect and that are still in first-class condition. In building them up only the very best materials are used. They are cured in the most modern and best moulds manufactured. They are never over-baked or under-cured, and will give as satisfactory wear as many tires costing twice the money.

We sell our tires on a 3500 mile adjustment guarantee. We guarantee them to be free from imperfection in material and workmanship, and if defective they will be adjusted on the basis of service given. The proper pressure to get the greatest amount of wear is 20 lbs. per inch.

We want you to try these tires out because we know if you once use them you will always use them. We know, too, that they will give splendid satisfaction to you. Then why pay regular prices when you can get

**THE SAME MILEAGE FOR

TOOL BOX, HANDY SIZE—High grade sheet steel; highly finished black enamel baked on; one piece pressed cover of unusual depth; electrically welded back seam; and bottom welded to lugs.
1R6301—Length 22 inches; width, 9 inches depth, 6 1/2 inches; weight, 11 1/2 pounds.
 Each.....4.85

CHAMPION X SPARK PLUG

For use with Ford Cars; designed to get the maximum result out of the motor, black finish hexagonal steel body; genuine Kaelin porcelain, guaranteed against heat breakage.
1R6302—Is specially recommended for Ford Cars.

Weight four ounces.

Each.....75

EXTRA PORCELAINS

Made of special heat-proof composition, complete with gaskets.
1R6303—For Champion X Plug petticoat style; weight 2 ounces.
 Each.....45

TIRE PUMP

A strong, sturdy, reliable pump; simple in construction throughout; easily taken apart; cylinder is screwed into base and upper casting double action; one barrel works inside the other and there is nothing to get out of line; no rods to bend and cause friction while in operation.

1R6304—Length of barrel, 16 inches; size of cylinder, 1 3/4 in.; length of tubing, 22 inches; weight, 3 pounds.

Each.....3.15

RADIUS RODS—Make car run more steadily by removing vibration from front axle; keeps axle straight.

1R6305—Black enamelled angle steel rods. Size 1/2 by 3/4 by 31 inches. Each.....1.40

OIL AND GREASE GUN—Threaded to fit the tapped opening in the Ford differential; loads and discharges the heaviest grease as well as the lightest oil.
1R6306—Capacity 7 ounces. Each.....90

ROBE RAIL

Specially designed for Ford cars; drop pattern; 3/4-inch black enamel steel bar; length over all 28 inches.

1R6307—Robe Rail for Ford cars.

Each.....70

RADIATOR HOSE—Extra high-grade pure rubber tubing cover; 3-ply light weight fabric.

1R6308—Outlet outside diameter, 2 1/4 by 2 3/4 inches. Each.....13

1R6309—Inlet outside diameter, 2 3/4 by 3 1/4 inches. Each.....20

OIL GAUGE

Indicates the oil level in the crank casing.

1R6310—3/4-inch glass body with brass gauge; length over all 3 1/4 inches. Each.....45

PRESSURE GAUGE

Tells instantly the amount of air pressure in tires; registers up to 120 lbs.

1R6311—Nickel plated brass body; complete with chamois purse. Each.....1.70

AUTOMOBILE JACK

Very convenient on any light or medium weight car; low enough to go under any axle when tire is deflated; foot lift is only six inches from the base.

1R6312—Capacity 1/2 of ton; height 9 1/2; rise 6 inches.

Each.....3.15

WHEEL PULLER

Quickly and easily removes any wheel fits all Ford cars; equipped for taper rear axles.

1R6313—Extra heavy centre ribbon construction. Each.....70

REPAIR PATCHES

Complete with sheet of patching, rubber cement; emery buffer and clamp to hold injured tube in place around kit case.

1R6314—Contains 72 square inches of patching.

Per box.....90

RUNNING BOARD BRACE

Simple but effective device to give Ford car required support; prevents running board from sagging; stops rattle and noise

1R6316—Black enamel angle steel brace, complete with clamps and nuts. Each 2.45

CUT OUT SETS

Permits the gas to be ejected when desirable without passing through muffler.

1R6317—Complete with steel coil spring and cable.

Per Set.....1.25

SOCKET WRENCH SETS

For Ford cars; will fit all nuts and bolts on a Ford car. The set consists of 7 pressed steel hexagon sockets from 17-32 to 31-32-inch; one 15-32 square socket; one oval bearing and nut socket; one square plug socket; one 8 1/4 inch dead black enameled ratchet wrench; one 9 1/4 inch steel extension tube with square opening and square head with Friction spring; one swivel joint and one forged steel screw driver; partitioned Fibre case, size 9 1/4 x 3 x 2 1/4 inches.

1R6318—Per set.....7.00

PEDAL RUBBERS

With corrugated surface to prevent the feet from slipping off the pedals.

1R6319—2 1/4 by 3 1/4 ins. Per set for Ford car.....45

OUR BLUEBIRD TIRES

If you have not studied page 62, do so. There you will find how you can cut your tire expense in one-half.

ASSORTED PINS

Contains 120 pins of assorted lengths and sizes necessary for automobile work.

1R6320—Per box.....15

COMBINATION PLIERS

With instant adjustment for holding large or small nuts.

1R6315—Polished nose, black handles, length six inches.

Each.....35

Tonneau Mats—Made with whipped edge from heavy grey Ventiplex woven material. The fact that this has been chosen by the manufacturers as part of the regular car equipment is assurance that it is satisfactory both in proportion and durability.
1R6401—Size 28 x 30 inches. Price each... **1.50**

FORD CAR COMFORTS

FOOT PROTECTOR SETS

For All Weathers

Heavy grey Ventiplex woven material, a material that is admirably suited to any purpose where a non-conductor is required. Ventiplex is a composite consisting of wool, hair, and India fibre, made very porous, yet strong and serviceable. This foot protector prevents cold air coming through the pedals and break in winter and prevents warm air and dust coming through in summer.

1R6402

PRICE PER SET

1.40

STABILIZER FOR FORD CARS—Takes the shock and vibration out of steering, and makes Ford handle like car equipped with worm and sector steering gear; quickly attached to front axle and steering cross rod; eliminates rattle.
1R6403—Price each... **9.00**

BURGESS SHOCK ABSORBERS

This is an essential to every Ford car. It lengthens the life of the car by safe-guarding it against preventable vibration. The quick-acting springs of the Burgess Rebound Check and Shock Absorber smother the jolts before they reach the vital parts of the motor and body. A car equipped with this device will not vibrate with the motor running idle. The front Absorber is attached to the frame by using a special nut on the regular fender bolt. To attach the rear Shock Absorber simply replace the regular bolt with a special bolt which fastens the rear cross member to the frame. Complete set of two front and rear Shock Absorbers.

1R6404—Price per set...

19.10

ANTI-SKID TIRE CHAINS

Tire chains are almost essential to the equipment of any car. With them a shower of rain causes no uneasiness as the driver feels sure that he can travel over greasy or slippery roads. The Anti-skid tire chains insures safe riding without loss of power. They are also a preventative against accidents and greatly minimizes danger. The chains described and illustrated here can be easily attached and easily removed.

1R6405

Size 30x3½.

PRICE PER PAIR

3.25

SUPERIOR AUTO HEATER

Has flat slanting top and ventilators at both ends and sides, permitting heat to be perfectly regulated at all times. Very economical on fuel. It has cold drawn steel ends; heavy nickel-plated trimmings; Brussels carpet cover; length 14 inches.

1R6407—Price each... **3.75**

MAKE NIGHT DRIVING A PLEASURE

Here is real electrical development for all models of Ford cars. It gives five degrees of light. When meeting oncoming cars a turn of the knob gives five merging degrees of light, prevents glare, yet gives clear view of road at any engine speed; also switches off. It is claimed by the manufacturer that it gives as good a light at ten miles as at eighteen without it. Can be attached to any Ford car in fifteen minutes.

1R6406

Price com- **7.50**

HOW TO ORDER GOODS BY MAIL

With the exception of Pumps, Farm Implements and Plowshares, we pay freight charges on orders amounting to \$20.00 or over. All Shoes are delivered charges paid to your nearest Post Office or Railway Station.

WE REQUIRE CASH WITH ALL ORDERS

Shopping by mail is satisfactory and convenient. It is satisfactory because if goods ordered do not open to your entire satisfaction you can exchange them for other goods or the cash just as desired. It is convenient because you can order in your leisure time and from a larger selection of goods than would be available to you in any other way.

HOW TO ORDER It will greatly assist us to promptly and correctly fill your order if you follow these instructions:

First—Write your name and address plainly.

Second—Use our regular order form if you have one; if you have not, any paper will do. Make a list of the goods you require, giving quantity, name of article, catalogue number and size, if any.

Third—Add up total cost of goods ordered and enclose your money in any one of the ways enumerated below.

HOW TO SEND MONEY You can send money by Express Money Order, by Post Office Money Order or Postal Note, which can be purchased in almost any express office or post office as the case may be; by cheque, which should be marked "Good" by your bank before mailing, and which should be made payable at par in Winnipeg; by Bank Money Order, by Bank Draft, or by Registered Letter.

Do not send money in unregistered letter; it is not safe and we will not be responsible for any addressed to us that may be lost in transit.

SEND SUFFICIENT MONEY As stated at the top of this page, with the exception of pumps, farm implements and plowshares, we prepay charges on all orders of \$20.00 or over and on all footwear. If your order does not consist of footwear and amounts to less than \$20.00, be sure to send sufficient for postage if you want it by mail; if you want it by express or freight, send sufficient for express or freight charges, if there is no agent at your shipping point;

otherwise we will have to hold up your shipment until we write you for more money. If you send too much we will promptly refund the balance.

WHEN GOODS ARRIVE Check the shipment carefully at the station and be sure that you receive the number of pieces you sign for. If there is any shortage, or if any of the packages are damaged, have the agent make a note to this effect on the receipt he gives you, then write us, giving full particulars of the damage or shortage and enclose your receipt.

RETURNING GOODS If at any time you find it necessary to return any goods to us you will save delay and greatly assist us if you observe the following simple instructions:

First—Put your name and address on the outside of the package being returned.

Second—Write us telling us how you are sending the goods and what is the matter with them.

Third—Return unsatisfactory goods at once; you cannot reasonably and honestly expect us to exchange them after you have kept them for weeks or months.

Fourth—Always return goods the cheapest way; up to eleven pounds, parcel post; from eleven to twenty-five pounds, express; over twenty-five pounds, freight.

OUR LIBERAL GUARANTEE

If you are not fully satisfied with any article purchased from us, return it to us at our expense and we will exchange it for other goods, or cash, just as you desire, and we will refund any transportation charges you may have paid on the goods returned.

APPRECIATION OF OUR CUSTOMERS

Battleford, Sask.—Received the harness all in good condition, and am very well satisfied with it.—Chas. M. Gray.

Mantario, Sask.—I beg to acknowledge receipt of saddle which landed O.K. and with which I am well pleased. Inasmuch as can be learned from appearance the service will give satisfaction. Several have examined it and it is quite probable other sales will follow.—E. F. Hyland.

Stenen, Sask.—Received the harness parts O.K. for which accept thanks.—H. L. Jarnajin.

Eckville, Alta.—I received the Farmer's Friend Saddle in very good condition and am very well pleased with the general appearance and the quality of material and workmanship. When I am in need of harness or any other class of goods you handle I hope to place my order with you.—Mrs. Geo. Kidd.

Batoche, Sask.—I have dealt with your company for years and have always had good service and satisfaction.—Louis Marion.

Glidden, Sask.—I received the fur Chaparajos and they are O.K.—Oswald W. Dallain.

Iroquois, Ont.—The stock saddle I bought from you is fine, and has been greatly admired by all who have seen it.—Jas. Watson.

Claresholm, Alta.—I received the Saddle that I sent for all right, and I like it fine.—Arthur Anderson.

Lomond, Alta.—My order arrived in good shape and I wish to thank you for your kind attention.—Geo. A. Tippus.

Amaranth, Man.—I have received the goods O.K. and desire to thank you for same. I shall be pleased to send to you for anything I may require in the future.—J. Pollard.

Minotons, Man.—I am well pleased with the harness and blankets. They are certainly good quality.—Geo. Young.

Tisdale, Sask.—I am very well pleased with the harness I bought from you in 1918, and as I desire to buy again, please send me your latest catalogue.—Lorne A. Hainstock.

Glengrove, Man.—I think the Saddle I bought from you is the best value for the price, I have ever seen, and I have never seen better leather than is in it.—Joe Snort.

Medicine Hat, Alta.—The Harness I bought from you has the very best quality of leather in it.—W. G. Clement.

High River, Alta.—The harness we purchased from you four years ago is giving good satisfaction and I want another similar set.—E. E. Sage.

Dunblane, Sask.—I have received the saddle which I recently ordered from you and must say I am very well pleased with it.—D. R. Rustin.

Eden, Man.—I received my shipment of goods and I am well pleased with them as they unpacked to my entire satisfaction. I may want some more harness later on and I will again call on your firm. I certainly appreciate the way you treat a returned soldier. Please accept my heartiest thanks.—J. L. McNaughton.

Galarmeuville, Alta.—We received our goods, and are well satisfied. We are more than pleased with the Pinery harness. We figure that we saved between thirty and forty dollars a set by sending to you for it.—A. J. & A. B. Chapman.

WE OFFER THE BEST VALUES

The prices quoted in this Catalogue unquestionably represent the very best values obtainable in the several lines. The Harness, Saddles and Horse Collars are all made in our own factories. They are honestly made and will give entire satisfaction. They are also sold very close to the cost of production. That is the reason our prices are the very lowest, commensurate with high quality. All the implements we sell are bought direct from the Manufacturers and are sold at a very small advance on Manufacturers' prices. Remember too that everything we sell is covered by our liberal guarantee
